CMPE 272 - HW#2 - PROBLEM STATEMENT

Review/Study this week's slides and links/references
1.Develop a simple twitter service that implement any Twitter API to to programmatically create, retrieve and delete a Tweet in the Twitter Sandbox environment. e.g., ads-api-sandbox.twitter.com https://developer.twitter.com/en/docs/ads/general/overview/ads-api-sandbox.html
Links to an external site.
2.Develop a simple Web UI that implements your service and demonstrates the functions.
The twitter documentation is here:
https://developer.twitter.com/en/docs/ads/general/guides/getting-started
Links to an external site.
   https://developer.twitter.com/en/docs/developer-utilities/twitter-libraries
Links to an external site.
Also. the example code in the Twitter Websocket Blueprint Example may be helpful.
See here:
https://github.com/apache/camel-examples/tree/master/examples/camel-example-twitter-websocket
NOTES:
 •   Include in the source code comments, i.e. who wrote which code.
 •   Code should include Unit tests (e.g. jUnit, TestNG, unittest, etc..)
 •   Submit a Word Document of UI interaction, with screenshots
